CPC20112 Certificate II in Construction

This qualification provides an occupational outcome and a range of support tasks applicable to a majority of construction work sites.

Occupational titles may include:
builder's labourer.

The qualification has core units of competency that are required in many Certificate III qualifications. The elective options are structured to allow choice from a range of units aligned at Certificate III level and in total could provide meaningful credit in a construction industry Australian Apprenticeship.

The construction industry strongly affirms that training and assessment leading to recognition of skills must be undertaken in a real or very closely simulated workplace environment and this qualification requires all units of competency to be delivered in this context.

Completion of the general induction training program specified by the National Code of Practice for Induction Training for Construction Work (ASCC 2007) is required before entering a construction work site. Achievement of unit CPCCOHS1001A covers this requirement

COURSE ENTRY REQUIREMENTS
There are no entry requirements for this qualification.

Illawarra ITeC require students to have average english, reading and writing skills, or higher and should have completed Year 10 or above schooling, or have sound workplace written communication skills. Participants will be required to complete a Language, Literacy & Numeracy (LLN) Assessment prior to enrolment.

UNITS OF STUDY
To be awarded a full qualification in Certificate II in Construction - CPC20112 you will need to be assessed as competent in 10 core plus 5 elective units of competency (15 units of competency). A Statement of Attainment will be issued for units deemed competent if a full qualification is not achieved.
